# AREAS OF EXPERTISE

Agile Development (Scrum) Ajax/CSS/DOM/HTML/jQuery Android Development API's and XML

Bash

Database Management Exports and Imports

Git

Javascript Linux

Object Oriented Design Operating Systems

PHPPvthon

Regular Expressions

SOLWordpress

# AREAS OF EXPERIENCE

Adafruit Android Applications **Compilers** Functional Programming Inventory Management via Web Marketing Campaigns (FB Pixel) Multi Threaded Processing Project Management Raspberry Pi's Recommender Systems Shopping Carts

# KEY SKILLS

Detail Oriented Professional Communication Simplifying Complex Systems

User Portals + Workflow

#### SIDE PROJECTS

Android App - Check List Battleship Website (JS, MVVM) Card Game (Java + Play!) Compiler (C++) Garbage Collector (OCaml) Multi-Threaded Word Count (C) Personal Websites -- Passtow.com NCSU Rest API (AJAX, JS, XML) Search Engine (Java) Secret Santa App (Python) Web Scraper+EZ Apply (Python)

#### TECHNICAL SKILLS

Algorithms + Mathematics Data Structures + Modeling Debugging + Testing

# RECENT PROJECTS

Apr. '19 - Present Full Stack Development of Portals and Shopping (PHP, JS, CSS) A full web server and website template that incorporates three levels of users: Members, owners, and administrators. Each access level has different screens and permissions: Members can add to their cart, owners can modify what members can purchase and update their inventory, and administrators can do member control. https://github.com/twoody/portals\_public

Wordpress Plugins (PHP, Ajax, CSS, SQL)

Oct. '18 - Present

Wordpress plugins to allow consumers to accurately locate and assess specific wiring information. Plugin utilized shortcode.php to send ajax request for SQL stored data. PHP written to advance site from 5.6 to 7.2.

https://mwswire.com/magnetwiretool & https://mwswire.com/litz-wire-tool/

Full Site Audit + Members Portal + Data Reporting

Dec. '18 - Feb. '19

Full systems overhaul to incorporate content auditing and new portals for members, owners, and admin. Technologies used consisted of Laravel, ClubReady API, and S3 incorporation for data analysis and reporting. Site auditing to ensure F.D.D. validation across 2 terabytes of content.
